Trainer strategy

Demonstrate each concept with one small working example, then move quickly into learner practice. For every lab, ask learners to show the evidence - the n8n execution trace, the generated media, the call transcript, the scorecard. Do not accept a screenshot of a finished screen as proof that the workflow is correct: a fluent output and a correct workflow are not the same thing, and telling them apart is the skill this course teaches.

Topic map

Session	Topic	Focus	Learning outcome	Labs
1	Topic 01 - Chatbot	Agents, retrieval and grounded answers: your first n8n AI agent, a RAG chatbot that admits what it does not know, and a customer-facing course	LO1	Lab 0, Lab 1, Lab 2, Lab 3

		advisor on a real website. Labs 0-3.		
2	Topic 02 - Voice Agent	Two vendors, two architectures: ElevenLabs runs the model and calls your n8n tools; with Vapi your n8n workflow IS the model. The contrast is the lesson. Labs 4-5.	LO2	Lab 4, Lab 5
3	Topic 03 - Video Agent	Lip-sync, avatars and text-to-video: from a script, to a mouth that moves, to a face that talks back, to video from nothing but a sentence. Labs 6-10.	LO3	Lab 6, Lab 7, Lab 7-os, Lab 8, Lab 9, Lab 10

Daily schedule

Total taught content: 13 hours 00 minutes across 12 labs.

Day 2 instructional time: 7h 30m (9:30am-5:30pm, less a 30-minute lunch).

Evidence the trainer collects

- Workflow exports and n8n execution traces for each lab.
- The provoked failures: the RAG refusal (Lab 2), the course that does not exist (Lab 3), Ava's medical refusals (Lab 5).
- The Google Calendar booking created by voice, with its call transcript (Lab 4).
- The lip-sync comparison scorecard: MuseTalk vs HeyGen on one script (Lab 6).
- Generated media: the news avatar videos (Labs 7 and 7-os), the Aria latency screenshot (Lab 8), the Nova session scorecard (Lab 9), the Veo clip and its shot prompt (Lab 10).
